Adding a printer on the Apple Mac

1. Add `hwstudent.ghum.kuleuven.be` to the DNS Search Domains of your Mac NIC:

   Working with ethernet cable:

   ![System Preferences > Network > Ethernet > Advanced]
Working with Wifi:

System Preferences > Network > WiFi > Advanced
2. adding the printer:

System Preferences  >  Print & Scan

Choose the printer for EBIB

Driver will be “Generieke Postscript Driver”: that’s ok.
Option “Duplex” will not be used, not so important > click ok.

Ready!
